	Acidic	Normal	Basic
pH			paCO ₂
HCO ₃			

Reference	Problem	Solution
	pH 7.26 paCO ₂ 32 HCO ₃ 18	Metabolic Acidosis Partially Compensated

Nurseslabs

Type 2 respiratory failure results from underventilation, which can occur even in the context of healthy lungs. Lung (or pulmonary vascular) disease disturbs the delicate ventilation-perfusion (V/Q) matching system. When you receive a copy of your blood test results, you might be confused by all the numbers and abbreviations. This implies a problem with V/Q matching (ie a problem with either the lungs or the pulmonary vasculature). ABG interpretation is not difficult. Blood Chemistry Also known as a chemistry panel or chem 7, this test actually includes seven tests that measure different enzymes in the blood as well as evaluate your kidney function. The problem with this measurement is that it is markedly affected by PaCO₂. The major advantage of BE is that its normal range is really easy to remember. What one would like to know is what the HCO₃ would have been had the PaCO₂ been normal. Only when hypoxia is more severe (approximately PaO₂
